Hammer & Discus

Athlete waiting area

NOTES

Athletes to use the same implement throughout.

Implements to be returned to a point 5m from the circle and picked up by athletes from there.

*Having two officials adjust the Hammer gates, should they not move easily, has the potential for social

disturbance.

tape would be threaded underneath the cage at the rear so that the second judge could pull through
 for damage because in Hammer gate wheels would roll over the tape.

The alternative is to operate as is normal, but the Chief Judge would need to remain distanced until the
 second judge had stepped to the back of the inside of the cage. With throws from a rear circle maintaining
 2m would be difficult but with changes this week, a lesser distance might be acceptable.

***Athletes returning their own implements would raise safety issues and slow a competition significantly.

PLEASE NOTE:

 provider should adopt
 the most suitable
 solution for their
 venue.
